

TO REMOVE DANDRUFF

Get a bottle of Danderine at any drug store, pour a little into your hand and rub all into the scalp with the finger tips. By morning most, if not all, of this awful scurf will have disappeared. Two or three applications; stop scalp itching and falling hair.—(Adv.)

YOUR SICK CHILD IS CONSTIPATED! LOOK AT TONGUE

Hurry! Mother! Remove poisons from little stomach, liver, bowels.

Give "California Syrup of Figs" if cross, bilious or feverish.

No matter what ails your child, a gentle, thorough laxative should always be the first treatment given.

If your little one is out-of-sorts, half-sick, isn't resting, eating and acting naturally—look, Mother! see if tongue is coated. This is a sure sign that its little stomach, liver and bowels are clogged with waste. When cross, irritable, feverish, stomach sour, breath bad or has stomach ache, diarrhoea, sore throat, full of cold, give a teaspoonful of "California Syrup of Figs," and in a few hours all the constipated poison, undigested food and sour bile gently moves out of its little bowels without griping, and you have a well, playful child again.

Mother can rest easily after giving this harmless "fruit laxative," because it never fails to cleanse the little one's liver and bowels and sweeten the stomach and they dearly love its pleasant taste. Full directions for babies, children of all ages and for grown-ups printed on each bottle.

Beware of counterfeit fig syrup. Ask your druggist for a bottle of "California Syrup of Figs," then see that it is made by the "California Fig Syrup Co."—(Adv.)

PARIS GIVES SLIGHT CREDENCE TO PEACE NOTE

Offer, However, Attributed to Teutons' Knowledge of Hopelessness of Situation.

(By John Mohugh Stuart.)
Paris, Sept. 15.—(U. N. S.)—Slight credence is given here to the sincerity of the Austro-Hungarian peace note appealing for a general conference ofelligerents. Nevertheless the offer is attributed to growing knowledge on the part of Teutonic peoples of the hopelessness of the military situation and a desire by the leaders of the central powers to save what is possible. The attitude of the French towards the central powers' offer might be summarized as follows:

"One Austro-Hungarian premier was kicked out for less than this."

"How much less credence should be given a statement by anonymous propagandists?"

"One way for the central powers to begin peace proposals is for us to hear from them."

"We surrender."

"Scores of French people of all classes, who discussed the outlook in the past few days, expressed the belief that another year of war would bring victory. But even if it does not, France will go on fighting, for she still remembers 1870."

"French leaders realize that one effect of the peace drive in the central powers was to buoy up the morale of the people."

HUNTSVILLE IN THREE

OF MUNICIPAL ELECTION
Huntsville, Sept. 15.—(Special.)—Huntsville is in the throes of a municipal election today, and by the way one of the hottest contested ones held in many years. Henry B. Chace, president of the Chase Nursery company, is a candidate for mayor on the law enforcement ticket, and Hine W. T. Hutchens, for sixteen years postmaster, and a prominent business man at all times, is candidate on the citizens' good government ticket. The entire tickets of both sides are claiming victory tonight.

GASLESS SUNDAY BLAMED

FOR SUICIDE OF WOMAN
Aurora, Ill., Sept. 15.—(U. N. S.)—Gasless Sunday is blamed for the death of Mrs. Daniel Grady, aged 24, and her infant baby by relatives here. She drowned herself and baby in a tank filled with three feet of water, it is believed, because she could not use the family auto to visit a soldier brother near here on Sunday, who was to leave for France.

WANTED—A MONKEY, BY

PRETTY ORGAN GRINDER
London.—(U. N. S.)—A woman organ grinder, and a very pretty one, will induce money from the pockets of Londoners on Italy's day, Sept. 25—if she can find a monkey.

The woman is Mrs. Marsh Allen, an Italian and wife of a well-known actor. She has pleaded for the loan of a monkey, and her plea doubtless will be answered.

PREFERS WOMEN OPERATORS.

Columbus, O.—(U. N. S.)—More than fifty women are employed in operating Standard Oil company's gasoline stations in this city. "We wouldn't take men, even if we could get them," says an official of the company. "We will fill all vacancies with women, because they have it all over the men."

BIRDMEN ESTEEM HEIGHT AS SAILOR ESTEEMS DEPTH, FOR LIKE REASONS

(By Lieut. L. Walmsley, of the Royal Air Force.)

London.—The airman esteems height even as the sailor esteems deep water, with an ample freeboard, and for similar reasons.

For every 1,000 feet of height the average aeroplane can glide a distance of about a mile, so that a pilot whose engine fails at a height of 10,000 feet, is safe for a ten-mile journey in any direction. In a recent experiment an aeroplane from a height of 20,000 feet glided twenty miles with the engine off, landing safely.

Therefore, the pilot has a circle of country twenty miles in diameter and nearly 315 square miles from which to choose a suitable landing ground. Compare this with the idea of engine failure at 1,000 feet, or, worse still, a few hundred feet, and you will see

why airmen say, "Safety in height."

In flying at some height may mean all the difference between a "crash" and a perfect landing, while on active service it may mean the difference between death or capture by the enemy and landing safely behind your own lines.

In aerial fighting the value of height is even greater, for the man who finds himself even a few hundred feet above an opponent has a reserve of diving power which can be used to deadly advantage. The latest type of British "chaser" can be dived at a rate of over 200 miles an hour, and the Hun pilot who suddenly looks up and sees one of these terrible hawks hovering above his head almost invariably attempts to dive and land behind his own line before the fatal swoop comes. Height again is very necessary when crossing the lines or in the vicinity of the enemy's anti-aircraft barrage, for although hits are not unknown at great heights, the really effective range of "Archie" is well short of high altitudes. Height means a wider area of vision for the observer, an important point in reconnaissance at sea, where valuable information as to the enemy's disposition in ships, etc., may be obtained on a clear day from an immense distance if a machine can operate at a sufficiently great altitude.

It is true that visibility of detail is decreased by height, but, thanks to recent developments of the British aerial camera, this is not so important as it was at the beginning of the war. As to the physical effects upon the airmen of flying at great heights, these can be to a large extent neutralized by the use of special clothing and oxygen.

WOMEN NEEDED FOR RED CROSS HUT SERVICE

Request That Comes From Paris Emphasizes Importance of Work to Be Done.

Atlanta, Sept. 14.—(Special.)—The division headquarters of the American Red Cross at Atlanta, has just been advised by wire from Washington of the receipt of a Paris cablegram at national headquarters, emphasizing the importance of recruiting at once women workers for the hospital hut service in France. "At least 300 high grade attractive women for this activity must arrive from all divisions before Nov. 1," reads the Paris cable and continues with the information that "present force is inadequate for existing needs, which are expanding by leaps and bounds." The hospital hut service referred to has to do with the operation of huts at hospitals formerly handled by the Y. M. C. A., but now entirely taken over by the Red Cross. Women who are keen for entertainment work are especially needed. There are four women to each hut. These women should have attractive personalities and cheerful dispositions. A knowledge of French is not absolutely necessary. Volunteers are wanted. Where this is not possible an arrangement similar to that for canteen workers may be made in regard to expense. The uniform for workers in the hospital hut service is the same as that for canteen workers. The age limits are twenty-five to forty years.

CLEVELAND TO HOLD CITY ELECTION OCT. 22

Cleveland, Sept. 15.—(Special.)—The election for city officials occurs Oct. 22, and the democrats have placed in the field a full ticket. The nominees are: For mayor, J. W. Higgins; for city justice, John G. Herring; for city recorder, Elmo Bartlett; for water commissioner, George F. Hall. Mr. Hall and Mr. Bartlett are now filling the positions for which they have just been renominated. Mr. Herring is the retiring county court clerk, having been succeeded by J. R. Henderson. Mr. Herring is not a democrat, but a bull moose republican, who yet refuses to follow the colonel back into the G. O. P.

While as an organization the republicans have made no nominations, William Howard Haven, prominent young republican lawyer, is an open candidate for mayor. Former Senator M. T. Fouts, republican, is a candidate for city recorder.

FINED \$100 A WORD
FOR SEDITIOUS REMARK
Springfield, Ill.—(U. N. S.)—One hundred dollars a word. That is what Fred Sterr, a Decatur (Ill.) butcher, paid for making threats against the president's life. He was fined \$1,000 in federal court here for a ten-word diabolical utterance. Sterr claimed he was intoxicated on wine at the time.

MAYOR JOINS UNION.
Seattle, Wash.—(U. N. S.)—Mayor Ole Hanson, of this city, is now a member of the Boilermakers', Iron Shipbuilders' and Helpers' union of this city. The mayor has been working in the shipyards along with common laborers in order to aid in relieving the shortage of manpower.

The Flavor Lasts

Are Your steam pipes helping the Kaiser?

THE man who wastes coal in these days is giving comfort to the enemy. None of us do it knowingly, but we do it just the same unless we are sure that the heating systems in our houses, offices and factories are properly protected against coal waste.

Carey
ASBESTOS AND MAGNESIA
INSULATING MATERIALS

for hot air, hot water and steam plants will save coal this winter. Now is the time to carefully go over the heating plant in your house and the steam plant in your factory.

Personally assure yourself that you have no piping which is allowing coal in the form of heat to go to waste because the pipe is not covered with asbestos or magnesia pipe covering.

An investment in pipe covering will pay you about 33 1/3% dividends every year in coal saved and the first cost is the only cost. You must however be sure to get the right covering for the purpose. We can furnish you the right Carey Insulating material for hot air, hot water or steam piping.

We will be glad to give you full information including prices without any obligation on your part. Write or phone us.
